# Histoacryl®

Protection gets everywhere

## The first surgical tissue adhesive based on cyanoacrylate

For decades medical professionals around the world have put their trust in Histoacryl®. More than 1200 publications guarantee this.

## Room temperature

### Storage at room temperature

#### Evolving to make things better

Besides its well-known features, Histoacryl® can now be stored at room temperature.

- ▶ Excellent tensile strength
- ▶ Only one layer is needed
- ▶ Simple and precise dosage
- ▶ Ready-to-use ampoule
- ▶ Two colors available: easy visual control with blue version; undyed version particularly suitable for facial applications
- ▶ Ampoule sterile on its inside and its outside: the ideal tissue adhesive for closure of surgical incisions

# Saving time

## Wound closure in a minute

- ▶ Wound closure in a minute: back to routine immediately!
- ▶ Anti-bacterial barrier protects the wound<sup>1</sup>
- ▶ No need of refrigeration
- ▶ Significant less pain than suture materials<sup>2</sup>
- ▶ Saves time and costs: no need of local anesthesia or a second visit to the doctor to remove stitches
- ▶ Excellent cosmetic results<sup>3</sup>
- ▶ Water-resistant: showering is possible

## Saving pain. Saving time and costs

# Saving pain

Open the aluminium peel-pouch

Clean the wound and twist off the ribbed tip of the ampoule

Adapt wound edges

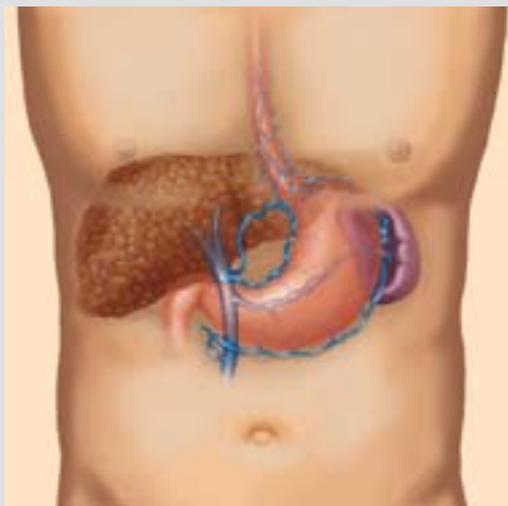

Apply Histoacryl® sparingly

Keep wound edges aligned for about one minute: that's all!

## Sclerosation of esophageal and fundal varices

The formation of esophageal and fundal varices is a common and dangerous consequence of portal hypertension. Effective sclerosation of these varices is possible with Histoacryl®.<sup>4,5</sup>

- ▶ Can be employed for non-bleeding and for bleeding varices
- ▶ Combined therapy with Histoacryl® and conventional sclerosation therapy is possible<sup>6</sup>
- ▶ Hemostasis is achieved in 93 % - 100 % of cases<sup>7</sup>
- ▶ Lower rebleeding rate than with band ligation<sup>8</sup>

## A Consolidated Technique<sup>9,10</sup>

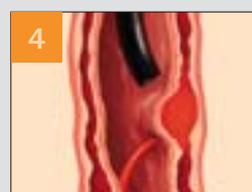

Introduce a compatible X-ray contrast inside a syringe

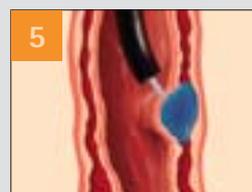

Introduce the syringe needle inside the Histoacryl® ampoule and suck the required volume

Gently mix both components and introduce them through the Histoacryl® injection needle\*

Puncture the varix and introduce the mixture inside

Histoacryl® cylinders are expelled from the esophagus / stomach wall into the lumen

\* Previous priming of the injection needle might be necessary, as per the doctor's instructions<sup>10</sup>

# Histoacryl®

Protection gets everywhere

## Histoacryl® for closure of endoscopic incisions

The Histoacryl® ampoule is supplied in sterile condition; therefore, Histoacryl® is the ideal tissue adhesive for use in the OR.<sup>3</sup>

For example, it may be used for the closure of endoscopic incisions, as described in:

*Rosin D et al. (2001) Closure of laparoscopic trocar site wounds with cyanoacrylate tissue glue: a simple technical solution. J Laparoendosc Adv Surg Tech 11(3):157-159.*

## Histoacryl® can be an ideal alternative to conventional suturing in:

- ▶ children's lacerations<sup>11, 12</sup>
- ▶ emergency room<sup>13, 14</sup>
